Index

Product Index 40 - 45

Think about any item of equipment on your site:

- How do you know it is fit for use?
- When was it last inspected?
- How do you identify it among the hundreds of similar items on site?

Without the latest information, people are prone to make assumptions. And assumptions can lead to potentially damaging decisions for both them and your business. The identity, maintenance and inspection status of equipment is therefore critical.

What are visual tags?

Visual tags help:

- Communicate the latest equipment inspection and test status clearly at the point of use
- Record an audit trail of recent equipment maintenance, tests and inspections
- Uniquely identify equipment
- Comply with Health and Safety legislation
- Reduce accidents in the work place

We can help you with Visual Tagging for Work at Height, Plant, Vehicles, Machinery & Tools, Workspace Control and Process & Pipelines.

In fact, whatever your equipment – we can tag it

DID YOU KNOW?

All the **Brady Visual Tagging Solutions** illustrated in this catalogue are available in a variety of languages.

HOLDER AND INSERT SYSTEM

Our visual tags typically comprise of two components:

Holder

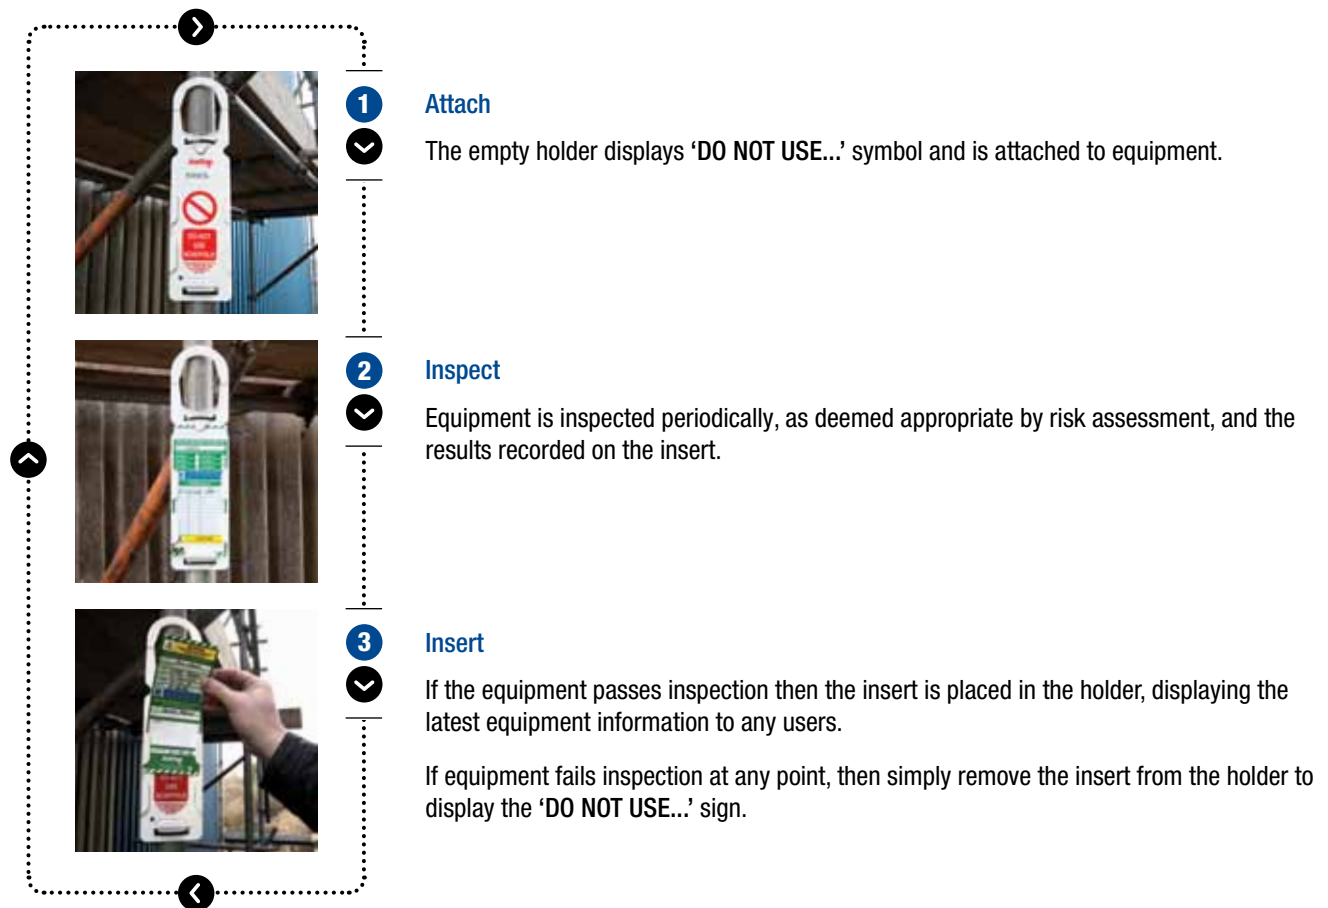

Attaches to the equipment being tagged.

Insert

Placed in the holder and used to record and display the latest equipment status.

Holder and Insert Work Together in a Looped Process

Attachment Methods

Magnetic Strip

Adhesive Strip

Split Ring

Hang Loop

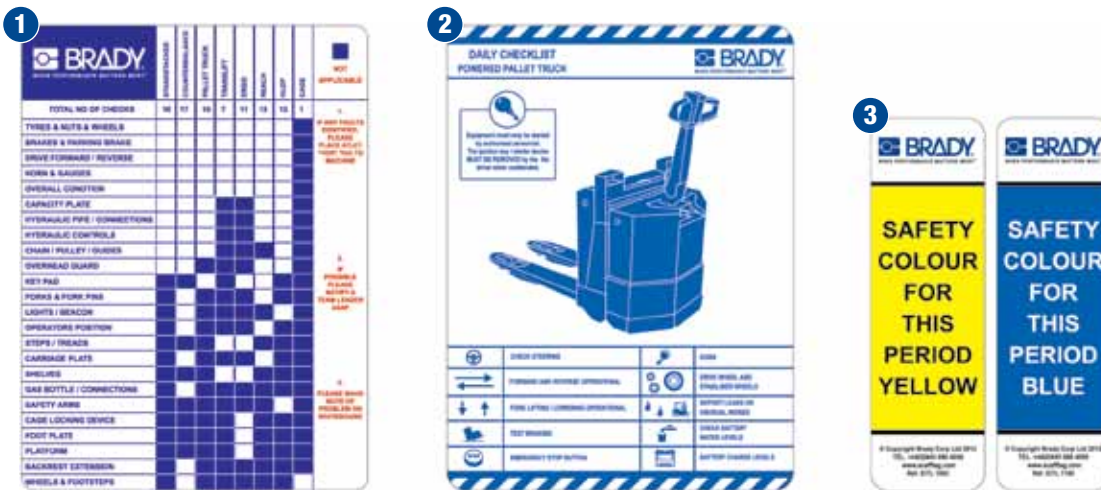

Cable Ties

Stop

CUSTOMISE YOUR VISUAL TAGGING

We can custom design Visual Tagging Solutions to help you manage virtually any issue and fit seamlessly with your business and systems. A wide range of customisation options are available including:

- Tag size and shape
- Data to be displayed/recorded
- Visual design including logo, colours and fonts to reflect corporate branding
- Adapt to site requirements e.g. Metal strips for magnetic detection in food plants
- Attachment methods e.g. cable tie, split ring, magnetic, adhesive

A Library of Ideas

We have literally thousands of designs developed for other clients offering unique solutions which may be of interest to your business.

We do not charge any consultancy fees for working with you to develop your customised design. All you pay is a one off artwork set up charge with your first order. You can then reorder paying the price of the standard insert and holders used for your solution.

So whatever your issue, contact us for a no-obligation solution.

1 Plant Machinery Inspection Checklist

An inspection checklist for a wide variety of plant machinery, from stand stackers to pallet trucks, consolidating in one custom designed and branded tag.

2 Pallet Truck Inspection Checklist

Company colour scheme and branding applied to a custom inspection checklist for a fleet of powered pallet trucks ensuring consistency of branding.

3 Colour Coded Safety System

A custom designed colour coded system indicating a safe working period on site. Prominent use of your logo enforces the concept that the safe working policy originates with the company itself and not a third party.

PERSONALISE YOUR VISUAL TAGGING SOLUTION

Brady's personalisation service allows you to add your company logo to our range of standard visual tags, while the design of the tagging system remains unchanged.

Logo printed on holder hang loop

Logo printed at the top of holder body

Logo printed on white strip at head of insert

Add your logo to:

- Our standard inserts - most of our inserts are designed with a white band ready to accommodate your branding
- To the holder - Typically printed at the top of the holders main body
- The upper curve of the holders hang loop (not available on Laddertag®, Nanotag™, Multitag®, Microtag®, Unitag®)

How Do you Get your Artwork Personalised?

A logo needs to be supplied in the correct file format and suitable quality for artwork personalisation. Ideally all logos will be supplied in vector format, and any colours e.g. Pantone references, need to be specified.

Colour Information

When sending your artwork files you will also need to supply the correct colour information for your product. Please indicate the PMS (Pantone Matching System) colour required, but if in doubt this can be discussed with our artwork department beforehand.

Image Resolution

We require high quality black and white line artwork, printed at a minimum of 300 dpi, must be 100% of the actual imprint size. Artwork must have crisp, sharp edges and needs no further touch up. Some thin lines, small copy and reverses may not reproduce as submitted and may need to be altered to print clearly.

PLEASE DO NOT SUPPLY EITHER SCANNED OR IMAGES WHICH HAVE BEEN PLACED IN OTHER DOCUMENTS SUCH AS WORD, POWERPOINT ETC.

General Information

Reduce the file size if possible, particularly if you plan to send the artwork by e-mail. Use one of the following programs to compress your file (please remember to name your file): WinZip, 7-Zip. Using compression software is essential when e-mailing vector graphics (AI, EPS, CDR).

WE REQUIRE ALL VECTOR GRAPHICS/PHOTOSHOP DOCUMENTS TO BE SAVED IN ADOBE CREATIVE SUITE VERSION 3 (CS3) FORMAT. ALL COREL DRAW DOCUMENTS NEED TO BE SAVED AS SINGLE PAGES. ALL EPS FILES NEED TO BE SAVED IN AN EDITABLE FORMAT.

FORKLIFTAG® DAILY INSPECTION BOOKLET

The Forkliftag® Daily Inspection Booklet can record up to 252 daily inspections.

- Fits in our Forkliftag holder
- Contains an easy-to-follow pre-use operator guide
- Contains Machine Defect Report
- Sign and date your inspection checks with any type of pen

Insert

MEWP TAG

MEWP Tag is designed to help control frequent inspections, maintenance and identification of MEWPs (Mobile Elevating Work Platforms).

- The MEWP Tag Insert contains an easy-to-follow pre-use operator checklist and space to record up to 32 inspections
- The holder provides multiple attachment options such as cable tie or adhesive.
- Ensures MEWP operators are informed of latest equipment status clearly at the point of use

Holder

- **Material:** ABS (Acrylonitrile Butadiene Styrene) thermoplastic
- **Temperature Range:** -5 °C to +65 °C
- **Attachment Method:** Cable Tie, Adhesive Strip

Insert

- **Material:** Polypropylene
- **Temperature Range:** -10 °C to +90 °C

Please turn to **page 36** for a MEWP tag how to use guide.

NANOTAG™ FOR MACHINERY

Nanotag for Machinery is designed to clearly display the Next Inspection Date Due / Next Test Date at the point of use.

- A selection of coloured inserts are available providing the option of additional visual qualification
- NAN GP insert records the Next Test Date
- NAN GPI insert records Next Inspection Date Due

Holder

- **Material:** Nylon 6
- **Temperature Range:** -20 °C to +80 °C
- **Attachment Method:** Split Ring, Cable Tie
- **Extra Feature:** Embedded RFID chip as standard

Insert

- **Material:** Polypropylene
- **Temperature Range:** -10 °C to +90 °C
- **Design:** Identical both sides

Please turn to [page 34](#) for a Nanotag how to use guide.

MICROTAG® NYLON CABLE TIE ATTACHMENT METHOD

The most common way of attaching a Microtag is via a nylon cable tie threaded through the slots located at the head and foot of the tag. The Microtag slots are also large enough to accommodate Brady recommended steel cable ties. If attachment via the slot system isn't an option, then adhesive strips can be fitted to the back of the tags. [See page 30 for more details.](#)

NANOTAG™ FOR ELECTRICAL EQUIPMENT

Nanotag for Electrical Equipment is designed to clearly display the Next Inspection Date Due / Next Test Date at the point of use.

- A selection of coloured inserts are available providing the option of additional visual qualification

KEEP YOUR TAGS ATTACHED

For attachment, Unitag comes with plastic nylon or plastic coated wire stropps as standard. If a more durable attachment is required, stainless steel stropps can be added as an option.

MICROTAG® FOR HAVs - VIBRATION/NOISE

Microtag for Hand Arm Vibration is designed to record exposure to vibration and noise levels and inform the operator of the equipment at the point of use.

- Record Tool ID, Test Date, Vibration Magnitude, Max. Daily Use and Noise Level
- A selection of coloured inserts are available providing the option of additional visual qualification

Holder

- **Material:** Nylon 6
- **Temperature Range:** -20 °C to +80 °C
- **Attachment Method:** Cable Tie, Adhesive Strip

Insert

- **Material:** Polypropylene
- **Temperature Range:** -10 °C to +90 °C
- **Design:** Identical both sides

Please turn to [page 35](#) for a Microtag how to use guide.

SCAFFTAG® MK1

The world leading Visual Tagging System for scaffolding to help prevent working at height hazards and manage scaffolding inspection procedures.

- A Scafftag should be fitted at all access points (normally ladder access) from first build stage and remain on the structure until dismantle
- Record all important details relating to the scaffolding build
- Record the signature, time and date of up to 12 inspections per insert
- Holder loop compatible with both Tube and Clip and System scaffolding

Holder

- **Material:** Nylon 6
- **Temperature Range:** -20 °C to +80 °C
- **Attachment Method:** Hung, Cable Tie

Insert

- **Material:** Polypropylene
- **Temperature Range:** -10 °C to +90 °C

Please turn to **page 37** for a Scafftag how to use guide.

The **Brady Visual Tagging Solutions** illustrated in this catalogue are available in a variety of languages.

For the product order codes corresponding to the relevant languages, please turn to **pages 40 to 45**.

SCAFFOLD QUARANTINE TAG

Quickly leave equipment, tools or scaffold in prohibition and clearly communicate who did it and why. Quarantine Tag is a great source of safety communication and compliance in the workplace.

Write in the comments box, wrap it around the asset and pull off the paper strip, revealing a see through sticky strip - it then seals in the text; hangs like a flag, showing 'quarantined' on one side and the details on the other.

Article No.	Order Reference	Description	Height (mm)	Width (mm)	Packaging
833753	MISC 160	Quarantine Tag	40.00	37.00	50 Quarantine Strip Tags

TOWERTAG®

Towertag is designed to display Mobile Tower safe working loads (SWL), movement references and inspection data at the point of use.

- Make information regarding the mobile towers build easily available
- Record up to 8 Mobile Tower movements
- Up to 10 records of inspections

Holder

- **Material:** Nylon 6
- **Temperature Range:** -20 °C to +80 °C
- **Attachment Method:** Hung, Cable Tie

Insert

- **Material:** Polypropylene
- **Temperature Range:** -10 °C to +90 °C

Please turn to **page 38** for a Towertag how to use guide.

NANOTAG™ FOR HARNESS

Nanotag for harnesses is designed to clearly display the Next Inspection Date Due at the point of use.

- A selection of coloured inserts are available providing the option of additional visual qualification

Holder

- **Material:** Nylon 6
- **Temperature Range:** -20 °C to +80 °C
- **Attachment Method:** Split Ring, Cable Tie
- **Extra Feature:** Embedded RFID chip as standard

Insert

- **Material:** Polypropylene
- **Temperature Range:** -10 °C to +90 °C
- **Design:** Identical both sides

Please turn to **page 34** for a Nanotag how to use guide.

ENTRYTAG®

Entrytag is designed to help prevent accidents and efficiently manage inspection procedures within confined spaces.

- Record information relating to the confined space such as permit numbers, test dates, and safety equipment required
- Record up to 42 shift inspections
- Alternative Entrytag holder with magnetic attachment available

Holder

- **Material:** ABS (Acrylonitrile Butadiene Styrene) thermoplastic
- **Temperature Range:** -5 °C to +65 °C
- **Attachment Method:** Cable Tie, Adhesive Strip, Magnetic Strip

Insert

- **Material:** Polypropylene
- **Temperature Range:** -10 °C to +90 °C

Please turn to [page 38](#) for a Entrytag how to use guide.

MAN IN...

Used in conjunction with Entrytag, each authorised person(s) has a dedicated Man in Confined Space or Man in Tank Tag (containing their details).

The Man In Tag attaches to the Entrytag before entering a confined space, removing the tag when leaving.

By counting the number of Man in Tags at the point of entry, it is instantly clear how many people are working in the confined space.

- **Material:** Polypropylene
- **Temperature Range:** -10 °C to +90 °C

PERMIT WALLETS

Permit Document Wallets provide ultimate protection and ease of viewing of permits / documents at the point of use.

- UV and moisture resistant
- Transparent
- Easy access zip closure from top to bottom
- Available in A4 and A5 sizes

Article No.	Order Reference	Description	Packaging
833760	PW1	A4 Permit Wallets	Pack of 1
833761	PW2	A5 Permit Wallets	Pack of 1

PEN CLIP HOLDER

The Pen Clip Holder is unobtrusive (13 mm width) and suitable for attachment to Entrytag, Forklifttag, Chemtag and MEWP Tag.

The Pen Clip Holder attaches to the side of the holder to ensure you always have a suitable pen at hand while completing your inspection and maintenance checks.

Pens are not included, they must be ordered separately. The pen clip holders accommodate the Edding 141 F pen supplied as standard with certain products.

Article No.	Order Reference	Description	Packaging
833759	SUND-PENHOLDER	Pen Clip Holder	Pack of 10

CHEMTAG®

Chemtag is designed to identify hazardous substances as defined by COSHH (Control of Substances Hazardous to Health):2002. The Chemtag insert contains all the pertinent information specific to the risks that hazardous substances pose, such as:

- Substance type
- Details of hazards and precautions
- Action to be taken in case of emergency
- Supplier's name and emergency telephone number
- Details of how to dispose of the item

Holder

- **Material:** ABS (Acrylonitrile Butadiene Styrene) thermoplastic
- **Temperature Range:** -5 °C to +65 °C
- **Attachment Method:** Cable Tie, Adhesive Strip

Insert

- **Material:** Polypropylene
- **Temperature Range:** -10 °C to +90 °C

FLANGE TAG

Flange Tag helps control inspection, modification and maintenance throughout the flange break / inspection process.

The system is three part perforated and assists the user to clearly identify the various stages of the operation from the initial break to the re-energisation of the system.

- **Material:** Polypropylene
- **Temperature Range:** -10 °C to +90 °C

STSI 522A Flange Tag

STSI 422DS Joint Tag

Article No.	Order Reference	Description	Height (mm)	Width (mm)	Packaging
833764	STSI 522A	3 Part Flange Tag	200.00	83.00	Pack of 10
833763	STSI 422DS	3 Part Joint Tag	200.00	83.00	Pack of 10

ISOLATION TAG

Isolation Tag is designed to help control mechanical and electrical isolation procedures and prevent inadvertent energising of the system.

Isolation Tag is a perforated tag and consists of two identical sections which are completed by the person in charge. The top half is attached to the isolation point, the bottom is removed and stapled to the Permit to Work. The isolation is lifted when the attached half is removed and re-united with the other on the Permit to Work.

- **Material:** Polypropylene
- **Temperature Range:** -10 °C to +90 °C

Please turn to [page 39](#) for an Isolation Tag how to use guide.

ADHESIVE STRIPS

Our double-sided adhesive strips are applied to the back of the visual tag holders for attachment to a flat surface.

Article No.	Order Reference	Description	Packaging
833765	ADH PAD	Adhesive Pads	Pack of 10

BLACK CABLE TIES

Our Cable Ties enable secure attachment of Visual Tags to corresponding equipment.

Article No.	Order Reference	Description	Packaging
833767	SUND-CABLE-TIES	Black Cable Ties	Pack of 50

SPLIT RING ATTACHMENT FOR NANOTAG

Split Rings work alongside Nanotag as an attachment option.

Article No.	Order Reference	Description	Packaging
833353	NAN-RING	Split Ring for Nanotag	Pack of 10

STAINLESS STEEL CABLE TIES

Our Stainless Steel Cable Ties offer an alternative to standard Cable Ties and enable secure attachment of Visual Tags to equipment.

Article No.	Order Reference	Description	Packaging
833768	SUND-CABLE-TIES-SS	Stainless Steel Cable Ties	Pack of 40

METAL FIXING RING FOR MAN IN TANK INSERT

Our Metal Fixing Rings are designed to attach 'Man in Tank / Confined Space' Tags to the Entrytag holder.

Article No.	Order Reference	Description	Packaging
831648	ENT-CLIP	Man In Tag Fixing Ring	Pack of 1

WIRE STROPS

Ends of Wire Strop screw together to create a looped secure tie. Used for secure attachment of Visual Tags to equipment.

Article No.	Order Reference	Description	Packaging
833772	SUND-WIRE PH 20	Wire Strop	Pack of 20

REUSABLE CABLE TIES

Reusable cable ties enable secure attachment of Visual Tags to corresponding equipment.

Article No.	Order Reference	Description	Packaging
833769	SUND-REL-100	Reusable Cable Ties	Pack of 100
833770	SUND-REL-140	Reusable Cable Ties	Pack of 140
833771	SUND-REL-250	Reusable Cable Ties	Pack of 250

PEN CLIP HOLDER

The Pen Clip Holder is unobtrusive (13 mm width) and suitable for attachment to Entrytag, Forklifttag, Chemtag and MEWP Tag.

The Pen Clip Holder attaches to the side of the holder to ensure you always have a suitable pen at hand while completing your inspection and maintenance checks.

Pens are not included, they must be ordered separately. The pen clip holders accommodate the Edding 141 F pen supplied as standard with certain products.

Article No.	Order Reference	Description	Packaging
833759	SUND-PENHOLDER	Pen Clip Holder	Pack of 10

WORKER ID TAG

Worker Emergency ID Tag securely stores the workers critical and potentially lifesaving ID information, essential in the event of a serious accident or medical emergency.

- Adhesive strip attaches securely to exterior of the workers hard hat
- 100% waterproof: can be used in extreme conditions
- Helmet safe: will not weaken or damage the workers hard hat in any way
- Weighs less than 5 grams
- Security flap protects the workers information

Article No.	Order Reference	Description	Packaging
833773	WSID 02	Worker Emergency ID Tag	Pack of 1

PERMIT WALLETS

Permit Document Wallets provide ultimate protection and ease of viewing of permits / documents at the point of use.

- UV and moisture resistant
- Transparent
- Easy access zip closure from top to bottom
- Available in A4 and A5 sizes

Article No.	Order Reference	Description	Packaging

WHAT IS RFID TECHNOLOGY?

Radio Frequency Identification (RFID) is an automatic identification system which utilises radio waves to transfer a unique ID from a storage medium to a device configured to read it. RFID does not require physical contact between the reader and the storage medium for data transfer to occur, the signal is also able to pass through different object dependent on their physical properties i.e. low frequency radio waves are more effective in environments where there is a lot of metal present.

FORKLIFTAG®

Stage 1

Attach the Forkliftag holder to the cabin of the forklift with cable ties or adhesive in a position which is non-obtrusive to the forklift or operators use but clearly visible. The operator conducts a pre-shift inspection following the pre-use checklist detailed on the Forkliftag insert.

Stage 2

The pre-use check is recorded by the operators signature and date on the Forkliftag insert. If the Forklift is considered fit for use, place the Forkliftag insert into the Forkliftag holder with the daily inspection details displayed, so that anyone can see at a glance when the vehicle was last inspected.

Stage 3

If the forklift is considered not fit for use at any point, remove the Forkliftag insert from the holder and hand over to supervisor. The message 'Do Not Use Until Daily Check Has Been Carried Out or Fork Lift Truck Repaired' with prohibition symbol is clearly visible.

NANOTAG™

Stage 1

Attach the Nanotag holder onto the equipment with a split ring or cable ties in a position where it is clearly visible to the operator but is non-obtrusive to equipment operation, and the prohibition symbol is clearly visible before inspection.

Stage 2

Equipment inspection/testing is conducted by a competent person. If the equipment is considered fit for use, the Nanotag insert is placed in holder with 'Next Test/Inspection Date' recorded.

Stage 3

If the equipment should fail inspection at any point, remove the Nanotag insert from the holder to instantly display the prohibition notice.

UNITAG®

Stage 1

Attach the Unitag holder onto the equipment using the Unitag strop in a position where it is clearly visible to the operator but is non-obtrusive to equipment operation, and the prohibition symbol 'Do Not Use' notice is clearly visible before inspection.

Stage 2

Equipment inspection/testing is conducted by a competent person. If the equipment is considered fit for use, the Unitag insert is placed in holder with 'Next Test/Inspection Date' recorded.

Stage 3

If the equipment should fail testing or inspection at any point, remove the Unitag insert from the holder to instantly display 'Do Not Use' and prohibition notice.

MICROTAG®

Stage 1

Attach the Microtag holder onto the equipment with cable ties or adhesive in a position where it is clearly visible to the operator but is non-obtrusive to equipment operation, and the prohibition symbol and 'Do Not Use Equipment' notice is clearly visible before inspection.

Stage 2

Equipment inspection/testing is conducted by a competent person. If the equipment is considered fit for use, the Microtag insert is placed in holder with 'Next Test/Inspection Date' recorded.

Stage 3

If the equipment should fail testing or inspection at any point, remove the Microtag insert from the holder to instantly display 'Do Not Use Equipment' and prohibition notice.

MEWP TAG

Stage 1

Attach the MEWP Tag holder with cable ties or adhesive near the operator cabin or access point in a position which is non-obtrusive to the MEWP or operators use but clearly visible. The operator conducts a pre-shift inspection following the pre-use checklist detailed on the MEWP Tag insert.

Stage 2

The pre-use check is recorded by the operators signature and date on the MEWP Tag Insert. If the MEWP is considered fit for use, place the MEWP Tag Insert into the MEWP Tag holder with the daily checklist details displayed, so that anyone can see at a glance when the MEWP was last inspected.

Stage 3

If the MEWP is considered not fit for use at any point, remove the MEWP Tag insert from the holder and hand over to supervisor. The message 'Do Not Use Until Daily Check Has Been Carried Out' with prohibition symbol is clearly visible.

MULTITAG®

Stage 1

Attach the Multitag holder onto the equipment with cable ties or adhesive in a position where it is clearly visible to the operator but is non-obtrusive to the equipment operation, and the prohibition symbol and 'Do Not Use Equipment' notice is clearly visible before inspection.

Stage 2

Equipment inspection is conducted by a competent person. Using the Multitag Insert record the equipment reference number, any additional comments and the next inspection date due. If the equipment is considered fit for use, place the Multitag insert in to the Multitag holder.

Stage 3

If equipment should not be used or fails inspection, remove the Multitag Insert to instantly display the 'Do Not Use This Equipment' and prohibition notice.

SCAFFTAG®

Stage 1

Attach the Scafftag Holder with cable ties or hang on the scaffold pole at all legal access points (normally ladder access) from the first build stage. The empty Scafftag holder will clearly display the prohibition symbol and 'Do Not Use Scaffold' notice.

Stage 2

The scaffold is inspected by a competent person. The scaffold build details are recorded on the Scafftag insert. If the scaffold is considered fit for use, the Scafftag insert is signed and dated and placed in the Scafftag holder.

Stage 3

If the scaffold is considered not fit for use or fails inspection at any point, remove the Scafftag insert from the holder to instantly display 'Do Not Use Scaffold' and prohibition notice.

LADDERTAG®

Stage 1

Attach the Laddertag Holder to the ladder. We advise you attach the Laddertag between the 4th and 5th rung on the inside of the ladder so it is clearly visible but non-obtrusive to the user. Before first use the prohibition symbol and words 'Do Not Use This Ladder' are clearly displayed.

Stage 2

A pre-use checklist is provided on the reverse side of the Laddertag insert. After the ladder is inspected the details are recorded on the Laddertag insert (ladder reference number, ladder class, duty/use, date of next inspection due). Following inspection, if the ladder is considered to be fit for use place the Laddertag insert into the holder.

Stage 3

If the ladder is considered not fit for use at any point, remove the Laddertag insert to instantly display the 'Do Not Use This Ladder' and prohibition notice.

TOWERTAG®

Stage 1

Attach the TowerTag holder on the mobile tower with cable ties or using the flexible loop head on the TowerTag holder. Attachment position should be close to access point or where it is clearly visible to any user. The empty TowerTag holder will clearly display the prohibition symbol and 'Do Not Use Tower' notice.

Stage 2

The mobile tower is inspected by a competent person. The towers build and location details are recorded on the TowerTag insert. If the mobile tower is considered fit for use, TowerTag insert is signed and dated and placed in the TowerTag holder.

Stage 3

If the tower is considered not fit for use or fails inspection at any point, remove the TowerTag insert from the holder to instantly display 'Do Not Use Tower' and prohibition notice.

ENTRYTAG®

Stage 1

Attach the Entrytag holder with cable ties, adhesive or magnetic strip to the entrance of the confined space where it is clearly visible. The empty Entrytag holder will display the prohibition symbol and 'Do Not Enter' notice.

Stage 2

A competent person conducts an inspection and records the details on the Entrytag insert. If the area passes inspection place the Entrytag insert into the holder.

Stage 3

If the area should not be entered or fails inspection at any point, remove the Entrytag insert from the holder to instantly display 'Do Not Enter' and prohibition notice.

CHEMTAG®

Stage 1

Attach the Chemtag holder with cable ties or adhesive where it is clearly visible on the storage, racking or room entry. The empty Chemtag holder will clearly display the prohibition symbol and 'Do Not Use' notice.

Stage 2

Complete the Chemtag insert by identifying all chemical hazards and precautions. Write the action to be taken in case of emergency in the space provided. Enter supplier's name, 24 hour emergency telephone number and details of how to store and dispose of packaging. The bottom of the Chemtag insert consists of details of medical warnings associated with the chemical. Place the completed Chemtag insert into the holder.

Stage 3

In the event of an accident the Chemtag insert should be removed from the holder and accompany the patient involved so that the appropriate medical treatment can be administered.

ISOLATION TAG

The Isolation Tag is attached to the asset with cable ties. The tag is perforated so that one section can remain attached to the asset and the other passed to the permitting authority, thereby clearly identifying the current status of the operation to all individuals. By using the perforation on the tag, each section can easily be removed without the need for either scissors or knives which may require additional permits.

PRODUCT INDEX

All the **Brady Visual Tagging Solutions** illustrated in this catalogue are available in a variety of languages as illustrated below.

Using the **Article Number** or **Order Reference** from your required product, select the language of your choice in the corresponding row. This will give you the order code for the product in your language.

If your language of choice is not available, or our standard product does not completely satisfy your requirements turn to **page 4** for more information about customising your Visual Tagging Solution.

BRADY - YOUR COMPLETE WORK SAFETY SOLUTION PROVIDER

Find out more safety products from our extensive portfolio. Visit www.bradyeurope.com or contact your nearest Brady Distributor.

LOCKOUT/TAGOUT - EFFECTIVE CONTROL OF HAZARDOUS ENERGY

Energy Isolation Device - a mechanical device that, when utilised or activated, physically prevents the transmission or release of energy, including:

- A manually operated electrical circuit breaker
- A disconnect switch
- A gate / globe / ball / plug / butterfly shut-off valve

SAFETY SIGNS - IMPORTANT INFORMATION AT THE POINT OF NEED

We offer more than 8,000 different signs for safety, maintenance and facility identification.

- Designed to withstand even the harshest industrial environments
- Bright colours, bold text and intuitive pictograms
- Compliant with the latest standards and regulations
- Highly visible and easy to understand communication

PIPE MARKERS - EASILY IDENTIFY PIPE CONTENT AND FLOW DIRECTION

The correct identification of pipes ensures a better insight into a building's structure. Accidents, injuries and damage can be prevented.

SORBENTS - SMART SPILL CONTROL

Clean, fast and safe removal of oil, water and chemicals spills.

- Adsorbs 10-25 times its own weight within a few seconds
- Environmentally friendly
- Spend less time cleaning

AREA AND LOGISTICS MARKING

Creating a totally safe work environment requires several elements, clear signage and area marking is essential but is not sufficient by itself. Brady offers a complete range of additional marking methods with a variety of applications including:

- Floor marking
- Barricade and underground tapes
- Logistics and warehouse labelling
- Photoluminescent marking
- Stands and posts
- Safety Bumpers

DO-IT-YOURSELF SIGN MAKING

Brady offers a full range of printer solutions to make your own Safety Signs. Choose from a variety of capabilities and options to provide high quality, cost-effective printing on a complete line of labelling materials.

Brady Corporation

Our mission is To Identify and Protect Premises, Products and People

Company Overview

BRADY was founded in 1914 in Eau Claire, Wisconsin, as W.H. BRADY Co., and renamed BRADY Corporation in 1998. The company began selling products internationally in 1947. In 1984, BRADY went public, with stock trading on the Nasdaq Stock Market, and in 1999, moved trading of its stock to the New York Stock Exchange, where it trades under the symbol BRC. The company's global headquarters is in Milwaukee, Wisconsin.

Brady manufactures and markets:

- products for identification and safety applications such as signs and markers, and printing systems and software to produce identification products on site and on demand.
- products for wire identification, including labelling materials and tools for wire and cable marking in the electrical and telecommunication markets
- high-performance identification products, including labels and signs that remain legible and highly adhesive even in harsh environments
- precision die-cut parts, including custom die-cut and slit materials for use in mobile handset, consumer electronics, medical, hard disk drive and automotive markets
- identify people and enhance security by ensuring the right persons are in the right places at the right time

Operations – Some facts:

- 6500 employees around the world
- Operations in 29 countries
- Distribution in more than 100 countries through more than 4,400 distributor partners
