

# Ultra Compact Lock Box

## for efficient maintenance

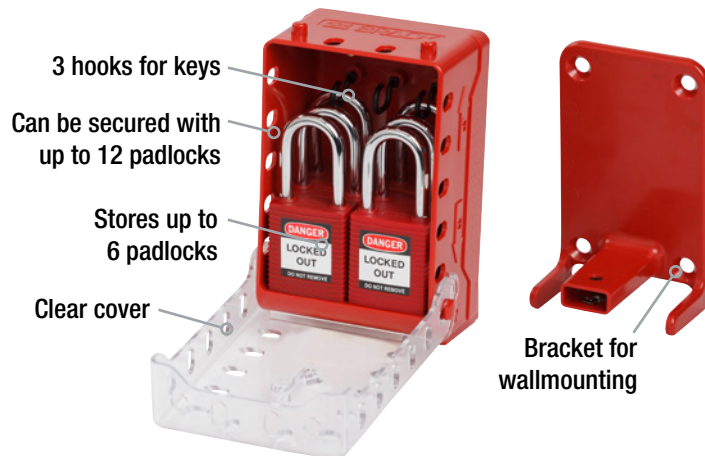

The Ultra Compact Lock Box enables safer maintenance operations with Lockout/Tagout in an efficient way. The box can store and carry up to 6 padlocks and keys, and can be locked by up to 12 padlocks, making it a highly practical tool for teams and across shifts to keep machine energy control points locked in the off-position until maintenance is done.

### Easily store and carry

The Ultra Compact Lock Box is ideal to store and carry up to 6 standard padlocks and can be mounted on a wall near machinery to make padlocks easily available. The hard plastic box also includes 3 hooks to hold keys and is equipped with a transparent cover to enable a content check at first glance. The box can be locked by up to 12 padlocks, enabling larger teams to isolate a machine from its energy supply until maintenance is done.

Order Reference	Description	Colour	Height (mm)	Width (mm)	Depth (mm)	Quantity
