Installing

Brady Workstation basic (free) version can be downloaded from here. First you need to fill out the form with your information and the button to download Brady Workstation becomes active.

To install, you have to open the downloaded „*Brady Workstation + Apps.zip*" and run „*Brady Workstation Setup.exe*". Language selection window opens.

Choose a suitable language and click „CONTINUE". After that, there's a selection between „Standard" and „Custom" installations. In most cases, „Standard" is enough („Custom" just provides a few more options).

Then you have to accept the „License agreement" and click „INSTALL".

When everything is completed, there's a chance to „Close" the window or „Launch Now".

If you choose „Launch now", Brady Workstation will run and start to install the Components:

After a while, it is finished and Brady Workstation will be ready to use.
Most important apps:

Custom Designer (Lite) – allows to use built-in/pre-existing label sizes to create new labels (add text, barcodes, images etc.) or to open/edit previously made labels.

For the first 30 days, you can use the fully functional **Custom Designer** for free. After the trial period, you can choose to continue with the free **Custom Designer Lite** or buy the full version. **Be aware**, labels that contain the full version functions (different barcode types, databases etc.) won't open in the free version.

Label Settings – allows the user to create new label sizes.

Brady App Store – allows the user to download new apps/expansions. All apps have a 30 day free trial period.
